Fast Efficient Search

Save your valuable time by finding the documents you need quickly and easily using our fast and powerful search engine.

Online Multi-Level Review

Streamline your review process with a multi-level online review process. Review and collaborate on policy updates online in MS Word format. Track reviews by committees, review groups and individual reviewers.

Joint Commission Standard References

Make your next Joint Commission survey on policies a breeze. Keep track of all policies that are related to Joint Commission standards and prepare them for the survey. Receive notifications on updates to Joint Commission standards that affect your policies.

Policy Questionnaire

Ensure quality of care by ascertaining your staffs knowledge of policies and procedures. Quiz your staff on their understanding of policies to maintain compliance.

Document Groups

Group related policies into context based manuals for easier access and distribution.

Policy Survey

Create a Policy Survey on policies and track staff acceptance of policies for continuous improvement.

Email Integration

Collaborate on policies and procedures using your existing email system. Simplify your policy review process by using automated email communications.

Work offline

Policy management should not be a burden. Download and work on your policies offline at your leisure whenever and wherever it is convenient for you.

Scan and Store

Convert your existing printed documents into digital format and load them into the system with the touch of a button.

Secure Access

Protect your documents from unauthorized access and accidental modifications using role-based security.

Document Control History

Trace the timeline and history of all versions of your policy and procedure documents from inception to current release.

Automated Policy Renewal

Keep your policies up to date by automatic scheduling of policy renewals. Receive timely notifications on policy renewal tasks.

Access Anywhere Anytime

The user friendly web Interface allows access from any computer, anywhere, anytime.

We match innovation with technology to build high value solutions that meet your business goals.
